Dear students,

Welcome! You will find Info as well as online teaching material on the course ILIAS page from the start of the lecture. You need to register for the course. Because of the CORONA situation, the course will be taught online. Below is some info before the course starts.

As of this semester the “old” surface and colloids module (6 credit points, 6LP), has been replaced with two new courses, each with 3 credit points (3LP). The new courses are this course “Nanopartilces and Nanomotors” (101410) and a course on “Emulsions and Foams” (101400).

Due to the CORONA crisis we have decided that there will be

- no practical lab part for this course (es wird kein Laborpraktikum geben)
- no change in the number of lectures or the credit points.

Information regarding: Nanoparticles and Nanomotors Properties and Materials:

- Lectures will be online and will start from the week of the 20th of April 2020.
- There will be no practical part. Furthermore, there will be no change in credit points or in the number of lectures.
- The course will be taught in English.
- There will be lecture notes (Skript) available online as a pdf to accompany the lecture.
- We will try and arrange dates for online “chats” so that you can ask questions.
- In diesem Fall sollte es auch einige online „chat“ Gelegenheiten auf Deutsch geben, so dass Sie Fragen stellen können.
- Course material will be on ILIAS. Course content is posted on ILIAS.
- If you have any questions, please send an email to Peer Fischer: p.fischer@ipc.uni-stuttgart.de
  (Fragen können auch auf Deutsch gestellt werden).

Regards,
Peer Fischer
