Group seminar winter semester 2022/23

Date	Name	Title
01.12.22	Timo Holzmann	Research internship - Testing the limits of the ferroelectric-nematic phase in mixtures
08.12.22	Tom Ott	Research internship - Synthesis and determination of the amount of acid sites of mesoporous aluminum-, zinc- and tin-silicates
15.12.22	Florian Kolb	Resent progress on Chitin Nanocystals
12.01.23	Carina Herrle	Bachelor Thesis - Geordnete mesoporöse Metalloxide mittels Flüssigkristall - Templating: Synthese & Charakterisierung
19.01.23	Tom Ott	Master Thesis - Influence of the pore size on the surface functionality of mesoporous metallo-silicates
26.01.23	Selina Itzighl	CNC films

The seminar takes place every Thursday at 11:30 a.m. in room 9-151.

Guests are welcome.
