Institute of Physical Chemistry

# Colloquium of the Institute of Physical Chemistry

**Summer  
term  
2025**

- |                       |                                                                                                                                                                        |
|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tuesday<br>29.04.2024 | Dr. Wen-Shan Zhang<br>University Heidelberg, Germany<br><br><b>Ultra-Low Voltage Scanning Electron Microscopy and Its Applications in Organic Functional Materials</b> |
| Tuesday<br>13.05.2025 | Jun.-Prof. Dr. Philipp Rothemund<br>University of Stuttgart, Germany<br><br><b>Functional soft materials for the next generation of lifelike robots</b>                |
| Tuesday<br>17.06.2025 | Jun.-Prof. Dr. Amirreza Aghakhani<br>University of Stuttgart, Germany<br><br><b>Microrobotic biomedical systems for targeted drug delivery</b>                         |
| Tuesday<br>08.07.2025 | Prof. Dr. Alwin Daus<br>University of Stuttgart, Germany<br><br><b>Material and Device Technologies for Low-Temperature Integrated Electronics</b>                     |
| Time:                 | 16:00                                                                                                                                                                  |
| Room:                 | 4.361<br>Pfaffenwaldring 55<br>70569 Stuttgart                                                                                                                         |
