Winter semester 2021/2022

Colloquium of the Institute of Physical Chemistry

25.10.2021  Dr. Simon Krause, Max-Plank-Institute for Solid State Research  
*Dynamic confinement and confined dynamics - teaching sponges new tricks*

22.11.2021  Dr. Sabrina Disch, University of Cologne  
*- canceled -*

29.11.2021  Prof. Dr. Andreas Menzel, Otto von Guericke University Magdeburg  
*Discrete particles in continuous environments: deformation, actuation, sensing, and active motion*

13.12.2021  Prof. Dr. Matthias Karg, Heinrich Heine University Düsseldorf  
*Polymer ligand stabilized nanoparticles: From absorption kinetics to tunable aspect ratio particles*

17.01.2022  Jun.-Prof. Dr. Jan Behrends, Freie Universität Berlin  
*Spins at work in energy conversion and storage devices*
